

Faseesin Ayokunumi

Full-Stack Software Engineer

dev@buildwithayo.com | 08149684195 | linkedin.com/in/faseesin-ayokunumi | github.com/Aytech00

SUMMARY

Full-Stack Software Engineer with 5+ years of experience building and shipping production web and mobile applications across healthcare, e-commerce, gaming, faith based community platforms, and real estate. Strong in React, Next.js, React Native, Node.js, and modern backend frameworks. Experienced in startup environments, including founding engineer ownership from architecture through app store release, collaborating closely with founders and small teams to deliver scalable systems.

SKILLS

Frontend: React, Next.js, React Native, TypeScript, Tailwind, Vite, SASS

Backend: Node.js, Express, Hono, REST APIs, PHP

Mobile: React Native, Expo, OTA updates, App Store and Google Play submission

CMS & E-Commerce: WordPress, WooCommerce, Shopify (Liquid, Storefront API)

Tools & Integrations: Git, pnpm, Turborepo, Docker, Redis, CI/CD, Stripe, OAuth 2.0, API Integrations, LangChain, n8n

EXPERIENCE

Founding Engineer, ChurchApp (Remote, Canada)

Feb 2026 – Present

- Refactored the backend of a community platform for Christian congregations, overhauling the security approach to deliver a more secure system.
- Introduced a write-through caching strategy with Redis, reducing database queries and improving content latency for end users.
- Replaced a manual deployment workflow with CI/CD pipelines, enabling fast and reliable continuous deployment.
- Created a design system with design tokens for consistent styling; refactored existing UI components to flexibly accommodate new features.
- Built and shipped the admin panel that powers the platform's core operations.
- Owned the React Native mobile app end to end, from development through App Store and Google Play submission; set up OTA updates for continuous delivery without store resubmission.

Frontend Engineer (Contract), Nursing With Light

2023 – 2026

- Built and shipped a React Native and Expo mobile application used by nursing students and professionals.
- Developed and refactored a Next.js admin platform into a scalable monorepo architecture.
- Owned feature development from concept through deployment in a production environment.

Frontend Engineer (Contract), LFGcon (Remote)

2024

- Built the frontend with React and Vite; transformed AI generated designs into a custom look with global design tokens and reusable components, refactoring the codebase into a module based architecture.
- Implemented authentication across the user and admin platforms using a JWE approach, ensuring security standards were met.
- Enhanced the platform with Stripe payments, QR code check-ins, and role based admin tools; delivered a production ready system used live during a 3 day US convention.

Full-Stack Developer, The Jersey Generator

2024

- Refactored a WooCommerce platform originally built solely for hockey jerseys to support 6+ sports categories.
- Transformed the UI design; built mockups in Figma and implemented them in production.
- Customized the product designer plugin to support advanced jersey personalization workflows.

Frontend Engineer, CryptixNFTs (Remote)

Jan 2022 – Jun 2023

- Integrated WalletConnect into the SvelteKit based ticketing application.
- Led the team that built the core NFT marketplace using React.
- Implemented designs from Figma and consumed backend APIs across the platform.

Freelance Web Developer, WordPress & Shopify Projects

2021 – 2023

- Built and deployed five business websites across healthcare, IT, education, and fashion for a UK based group; extended an LMS with custom dashboards and WooCommerce integrations.
- Developed a custom WordPress real estate theme using ACF, custom post types, and SASS.
- Customized Shopify storefronts using Liquid and the Storefront API, including subscription based experiences with custom sections and checkout logic.
